

About Transfer Center enaCom

The Transfer Center enaCom of the University of Excellence Bonn promotes the transfer of knowledge and technology between research, business, politics and society. Through close networking of these areas, innovations are promoted, implemented and made usable.

The services offered include scouting for innovative ideas and support for transfer projects, comprehensive support for spin-offs and advice on inventions and patent law.

Transfer Center enaCom projects are funded by the "EXIST - Raising Potential" programme of the Federal Ministry for Economic Affairs and Climate Protection (BMWK) and the Ministry of Economic Affairs, Industry, Climate Action and Energy of North Rhine-Westphalia (MWIKE).

We advise companies on

Research & Development

Research cooperations
Technology transfer

Start-Ups & Spin-Offs

Collaborations
Investment opportunities

Specialists & Young Talent

Practical presentations
in teaching
Workshops with students

Our Expertise

At the University of Bonn, more than 10,000 top researchers are working on key scientific, technological and social issues of the future. Their work deals with robotics or biomedicine, mathematical simulations or artificial intelligence. They shed light on key topics such as sustainability and cultural and socio-economic changes in our globalized world.

Whether the latest research results, qualified specialists, innovative business and start-up ideas or sponsoring - companies have a wide range of opportunities to cooperate with the University of Bonn. The joint establishment of endowed professorships or scholarship programs are also possible.

We support you in finding experts from different disciplines to help you get research collaborations, joint inventions or projects off the ground.

For Your Innovations

Current Transfer Projects

We are involved in the development of new transfer projects:

CAMPUS Transfer Management GmbH

In 2021, the University of Bonn founded CAMPUS Transfer Management GmbH together with leading institutions from NRW. The aim is to establish a competence center for the agricultural and food industry and to strengthen innovations in the bioeconomy and agribusiness in the Rhineland region.

Bonn Hub for Algorithmic Innovations in Medicine (BoHAIME)

BoHAIME supports the development of medical software at the University of Bonn. The hub brings digital innovations in medicine faster to the market and facilitates spin-offs. In particular, it addresses the challenges posed by the high demands on patient safety in the development of new software solutions.

Visual Computing Incubator

The University of Bonn is establishing a Visual Computing Incubator as a technological beacon for innovation and start-ups. The incubator offers a platform for start-ups that want to drive forward developments in the fields of computer graphics, virtual reality or human-computer interaction.

For Your Vision

For Your Competencies

Our Networks

We promote the exchange between you, our researchers and students as well as other companies with a wide range of networking events. As a member in various industry clusters and networks, we support the formation of collaborative partnerships as well as regional, national and international cooperation.

Our Talents

We connect you with our young scientists. We integrate practical presentations into teaching and develop new formats for exchange with students. Meet potential specialists and young scientists at our university.

Our Start-Ups

We support a growing number of researchers in founding their own start-up or spin-off company. With their innovative business models, they are valuable exchange partners or sources of ideas for you.
