Innovation Pathways to Sustainability
Distinguished Lecturers Series

Prof. Sabine Schlacke
„Managing land use as key challenge of the transformation to sustainability“
June 29, 2021, 17 h CEST, Zoom

Abstract
Only if there is a fundamental change in the way we manage land can we reach the targets of climate-change mitigation, avert the dramatic loss of bio-diversity and make the global food system sustainable. The WBGU proposes five multiple-benefit strategies illustrating ways of overcoming competition between rival claims to the use of land. These should be promoted by five governance strategies, especially by setting suitable framework conditions, reorienting EU policy and establishing alliances of like-minded states.

About the speaker
Sabine Schlacke is a full professor of Public Law with a focus on construction, planning and environmental law at Münster University. She is Executive Director of the Institute of Environmental and Planning Law and the Central Institute for Spatial Planning. Sabine Schlacke is a member of the German Advisory Council on Global Change since 2008 and became its Co-chair in 2016. The German Advisory Council on Global Change provides the German Federal Government with policy recommendations. 2019 she started to consult the German Federal Government also as Co-chair of the steering committee of the “Climate Protection Science Platform”, a body to advise and monitor the implementation of climate change policies. Furthermore, she is editor of the Journal of Environmental Law and vice-chair of the German Association for Environmental Law. In addition to her research and teaching activities, she is also Vice-President of the State Constitutional Court of the Free Hanseatic City of Bremen.
