

Visually Impaired Workplace for Students with Disabilities

(AVZ I, Endenicher Allee 11–13, 2nd Floor, Room 2.003)

The computer workstation includes the following:

- Computer with two swivel monitors, a keyboard (black with large, milled white lettering, incl. markings for the blind) and pre-installed ZoomText Magnifier/Reader software (PC large-screen program in German providing 1.25–60x magnification, including a text-to-speech program)
- Braille display with 40 braille elements/cursor routing keys, 6 function keys, 4 navigation keys and 10 braille input keys along with the NVDA control program
- “topolino flex” high-resolution camera system (color camera with white board and template functions, adjustable autofocus, true and false color display—contrast-enhancing and with negative display, PC or notebook connection via USB 2.0, large working area due to articulated swivel arm, remote control)
- Bearing-mounted cross table (freely movable in the X and Y directions, can be locked horizontally and/or vertically for writing)
- Scanner with “Omni Page 19/Ultimate” software (OCR text recognition and conversion program)
