

## Job Announcement

The Horticultural Sciences group at the Institute for Crop Science and Resource Conservation (INRES) is a Department of the University of Bonn, Germany. We are an interdisciplinary research group investigating pathways to improve the sustainability and resilience of horticultural systems under changing and uncertain conditions. We are aiming at providing decision-makers with actionable information that helps them make wise choices, which requires adequate consideration of the complex environment that many agricultural decisions must be taken in. In consequence, systems thinking and characterization of risks and uncertainties are central themes of our research. Much of our work focuses on fruit tree dormancy, agroforestry and the development and application of holistic modeling approaches in agricultural research.

The NIFAM project is a research and capacity building project in Vietnam (and Myanmar) financed by the German Ministry of Agriculture, which aims to identify and implement cost-effective interventions to sustainably improve the diet of urban residents in Myanmar and Vietnam to reduce malnutrition in its different forms. Policy makers are supported in their decision on which intervention is best in the local context through a decision modeling package based on a transdisciplinary research approach

To support the NIFAM management team, HortiBonn is looking for a:

### **Student Assistant** (SHK, WHF or WHK, 9 hours/ week) (m/f/d)

#### **Your main duty will be:**

- to assist in project management (e.g. editing of project reports, taking minutes during Zoom meetings, organization of virtual workshops, communication with project partners)
- to assist in administrative tasks (e.g. financial reporting, reimbursements)
- to assist in scientific tasks (e.g. literature search)
- management of project portal, as well as updating project news via social media
- performing other tasks, as needed

#### **We are looking for a student assistant:**

- who has a good mastery of oral and written English and German
- who is skilled in MS Word, MS Excel, and MS PowerPoint
- is interested in contributing to research for development
- who has first experience in project management or administrative tasks
- who has the ability to work independently, efficiently, and target-oriented.

#### **We are offering:**

- being part of an international, dynamic, and motivated team
- the possibility of working remotely or in the office in Enderich

The start of the position is planned for **April 2024** and the duration of the project is until the 31.03.2026

Interested candidates should submit a letter of interest, their CV, and relevant certificates by **02.02.2025** via email and as one PDF document (less than 5 MB) to **Dr. Simone Kathrin Kriesemer**, [sk.kriesemer@uni-bonn.de](mailto:sk.kriesemer@uni-bonn.de). Only shortlisted candidates will be contacted and interviews are planned for the week of **10. – 14.03 2025**.

In keeping with the University's policy regarding gender equity, female applicants are particularly encouraged. Disabled people with identical qualifications will be favoured.
