STELLENANGEBOT / JOB OFFER
IAME-2023-06

Research assistant (m/w/d) with interests in environmental, health and development economics

The Institute for Applied Microeconomics is looking for a research assistant who is pursuing a Master of Economics (or equivalent) degree to work on a project about the impact of drought on nutrition in sub-Saharan Africa and the mediating role of health facilities.

You will be working under the supervision of JProf. Julia Mink at the University of Bonn and Dr. Christoph Strupat at IDOS. Responsibilities include data preparation and analysis of geospatial data in Python or R, conducting literature reviews, and writing.

Fluency in English and experience with R or Python statistical programming language is required. Experience working with geodatabases is a plus.

Start date is September 1, 2023. The appointment is for a period of 6 months, with the possibility of extension. The position is 15 hours/week and is compensated at 13 EUR/hour.

To apply, send a resume, transcripts of grades, and a short letter of motivation (about half a page) to jmink@uni-bonn.de.

Applications will be considered on a rolling basis. Please apply as early as possible, but no later than July 15, 2023. We especially encourage women and members of underrepresented minorities to apply.
