

The **Hausdorff Center for Mathematics (HCM)** at the **University of Bonn** brings together researchers in mathematics and its applications, including in particular quantitative economics. In these areas of research the center is looking to appoint **up to four**

W2-Professorships ("Bonn Junior Fellows")

These are temporary appointments for a period of five years. Some positions may be endowed with tenure-track, and, in exceptional cases, a position may be tenured immediately.

The University of Bonn actively supports diversity and equal opportunities. The University of Bonn has been certified as a family-friendly university and offers a dual career-service. Its aim is to increase the proportion of women in fields in which women are underrepresented and to place a special focus on promoting their careers. Therefore, the university especially encourages applications from suitably qualified women. Applications will be handled in accordance with the Equal Opportunities Act of North Rhine-Westphalia. Applications from suitably qualified people with documented severe disabilities or from people with an equivalent status are particularly welcomed.

The general conditions of employment are subject to § 36 of the Higher Education Act of North Rhine-Westphalia (Hochschulgesetz des Landes Nordrhein-Westfalen).

The professorships

The professorships intend to encourage independent research by outstanding young researchers, analogously to the research groups of the Max Planck Society or the Emmy Noether Program of the German Research Foundation (DFG). The professorships are endowed with travel and guest funds during the initial period. Bonn Junior Fellows also have access to additional resources of the Hausdorff Center. Bonn Junior Fellows are encouraged to supervise doctoral students.

The candidates

We are looking for young researchers holding a doctoral degree who are starting to develop their own research agenda. Suitable candidates should have already demonstrated scientific independence with relevant publications. Candidates should have some international research experience. They will contribute to our advanced teaching program. German language skills are not required.

Research focus

We seek candidates who fit into the broad spectrum of the Cluster of Excellence and complement the existing expertise. Depending on the candidate's research focus, candidates become members of the "Faculty of Mathematics and Natural Sciences" or of the "Faculty of Law and Economics" at the University of Bonn.

The deadline for applications is September 16, 2023. The deadline also applies to letters of recommendation. The expected starting date is not later than 1 October 2024.

Deadlines for future application rounds and further details will be published at:

www.hcm.uni-bonn.de/opportunities/bonn-junior-fellows.

Applications should be sent, using our online application form

www.hcm.uni-bonn.de/bjf/application, to the joint hiring committee:

Hausdorff Center for Mathematics
Endenicher Allee 62
53115 Bonn
