INVITATION to the Virtual Opening of Neurotech\textsuperscript{EU}

16 December 2020

European University for Brain and Technology (Neurotech\textsuperscript{EU}) is opening its doors on the 16th of December. Come and join us to learn about Neurotech\textsuperscript{EU}'s plans for the next two decades, and explore possibilities to train, to do research and to innovate together with peers all over Europe. Follow us on Twitter (@NeurotechEU) for more details, and register for the Virtual Opening at bit.ly/NeurotechEU_VO

The event is free and open to everyone: students, researchers, academics and the public.

**Students** will have the chance to learn about the educational opportunities this European University offers;

**Researchers and academics** will step into the future of universities, to explore joint research and innovation across institutions throughout Europe;

**The public** will explore life-long learning programs, career-long professionalization training and citizen science initiatives.

For more information on how we plan to achieve the goals of

- Creating synergy for a joint long-term strategy for education and research at the intersection of Brain Sciences and Technology to increase the competitiveness of European education, research, economy, and society
- Transforming our universities with a joint long-term vision and action plan that is modular and scalable, that crosses academic, faculty or organizational boundaries
- Flexible curricula tailored to each student’s needs and not constrained by institutional capabilities and borders
- Promoting European identity among students and researchers with multicultural, multilingual, international and inter-sectoral experiences across the European continent
- Creation of the European Neurotech ecosystem which will support our students during their formative years in the university, and afterwards to transition into becoming responsible, ethical and global citizens of the economy and society
- Raising awareness of ethical challenges at the intersection of neuroscience and technology

and much more, do not hesitate and join us at the Kick-off meeting of the Neurotech\textsuperscript{EU} on the 16th of December, 2020, online. **The registration is already open.** Look forward to meeting you at Neurotech\textsuperscript{EU}!
About Neurotech\textsuperscript{EU}: Neurotech\textsuperscript{EU} is one of the 41 European Universities, funded in part by the European Commission. As the only neuroscience-focused European University and one of the five technology universities, Neurotech\textsuperscript{EU} has blue-printed a long-term development plan which will transform how our universities deliver education and offer new avenues for borderless cooperation at the cutting-edge of science and technology. With the upcoming Neurotech\textsuperscript{EU} joint research excellence centre, online campus, international and inter-sectoral graduate school, and European (bachelor, master, doctoral) degrees in Neurotechnology, it will offer unprecedented new opportunities in education, training and research while creating a Neurotech ecosystem to help realize Europe’s full potential. The founding partners of Neurotech\textsuperscript{EU} include Radboud Universiteit (NL), Universidad Miguel Hernández de Elche (ES), Karolinska Institutet (SE), Rheinische Friedrich-Wilhelms-Universität Bonn (DE), Boğaziçi Üniversitesi (TR), Oxford University (UK), Universitatea de Medicină și Farmacie „Iuliu Hațieganu” din Cluj-Napoca (RO) and Debreceni Egyetem (HU). They are joined by a rapidly growing list of associates, currently including 250+ partnering universities, research organizations, businesses, governmental and non-governmental organizations. For more information please visit www.theneurotech.eu. Questions can be directed to hq@theneurotech.eu.

European University for Brain and Technology

Neurotech\textsuperscript{EU}
Virtual opening

All about students

09:00 Welcome to Neurotech\textsuperscript{EU}
09:20 Q&A
09:30 Symposium: Students and Neurotech\textsuperscript{EU}

Neurotech\textsuperscript{EU} in session

11:00 Neurotech\textsuperscript{EU} opening its doors
11:05 European University Alliance - Rector’s perspective
11:15 Keynote: European Universities: Vision and action plan
11:45 Neurotech\textsuperscript{EU} roadmap to success: the next two decades
12:15 Keynote: Where do the brain sciences and future of technology converge

Neurochallenges and Neurotech2040

14:00 Neurotech2040: The Think Tank of Neurotech\textsuperscript{EU}
14:15 Eight parallel workshops on Neurochallenges
16:30 Closing: See you at Neurotech\textsuperscript{EU}
