Role
This is a fantastic opportunity for a creative student with a passion for UX/UI to gain practical, hands-on experience with this digital agency delivering products used by millions across the UK. You will work within a team of five skilled mobile designers and be involved with the definition and creation of the customer journey across multiple mobile apps within various sectors. There will also be opportunities to attend external meetings with client companies to ensure the right delivery. An internship with this host is guaranteed to be a great experience and boost to your future career prospects.

Tasks
- Defining the structure and flow of a user experience
- Detailed wireframes and prototypes for mobile apps and web
- Defining and validating concepts within user testing
- Creating user interfaces across a range of mobile app and web platforms
- Working closely with developers to test designs in real world settings

Desired Skills
- Educational background in computer science, business informatics or related
- Knowledge in human computer interaction, cognitive psychology, information science, technology of communications and user experience is an advantage
- Knowledge of Sketch, InVision and Adobe Creative Suite
- Understanding of user-centered design principles and methodologies.

The Host Company
The host company is an award-winning team of mobile consultants and mobile app development experts who, in the past seven years, has worked across multiple sectors with many prestigious clients. Providing the complete solution from design to finished product, they help to transform business processes, staff productivity and customer engagement, using mobile and location-based technologies. Ranked third in the Deloitte Tech Fast 50 UK Awards and recently acquired by a larger media company, this is an exciting time to be joining this rapidly growing organisation.
