Role

This is a fantastic opportunity for a talented Web Developer to assist in the development of the host’s website and service platform. This will help support the interaction between their clients’ needs and the potential of their 3D software which has revolutionised orthopaedic surgery. This is not only a great chance to develop your skills, but you will also be contributing to the future of medicine. This company has hosted several successful ESPA internships, so you are sure to have a rewarding experience, both inside and outside of work, in this lively city.

Tasks

- Development and support of the company’s website/platform
- Creation and maintenance of technical specifications and reports for a web-based software application
- Creation and execution of test scripts for web-based software application
- Creation of automated deployment and testing scripts

Desired Skills

Essential:

- Development experience in Java, JavaScript, Angular JS, HTML, SQL and CSS for web applications
- Strong problem-solving skills
- Strong written English language skills
- Strong interpersonal skills.

Good to have:

- Awareness of testing frameworks.
- Knowledge of cloud hosting
- Interest in the medical field and knowledge of medical procedures and devices

The Host Company

The host is an innovative medical technology firm specialising in creating 3D prints from traditional X-rays to provide surgeons and clinicians with an accurate model to improve diagnoses, prepare and plan surgical procedures. This results in increased efficiencies, advancement of surgical standards and most importantly the improvement of successful patient outcomes. With continued growth, this company is continuing to revolutionise the medical sector.
